

黄龙洞旅游图 — Yellow Dragon Cave Tourist Map

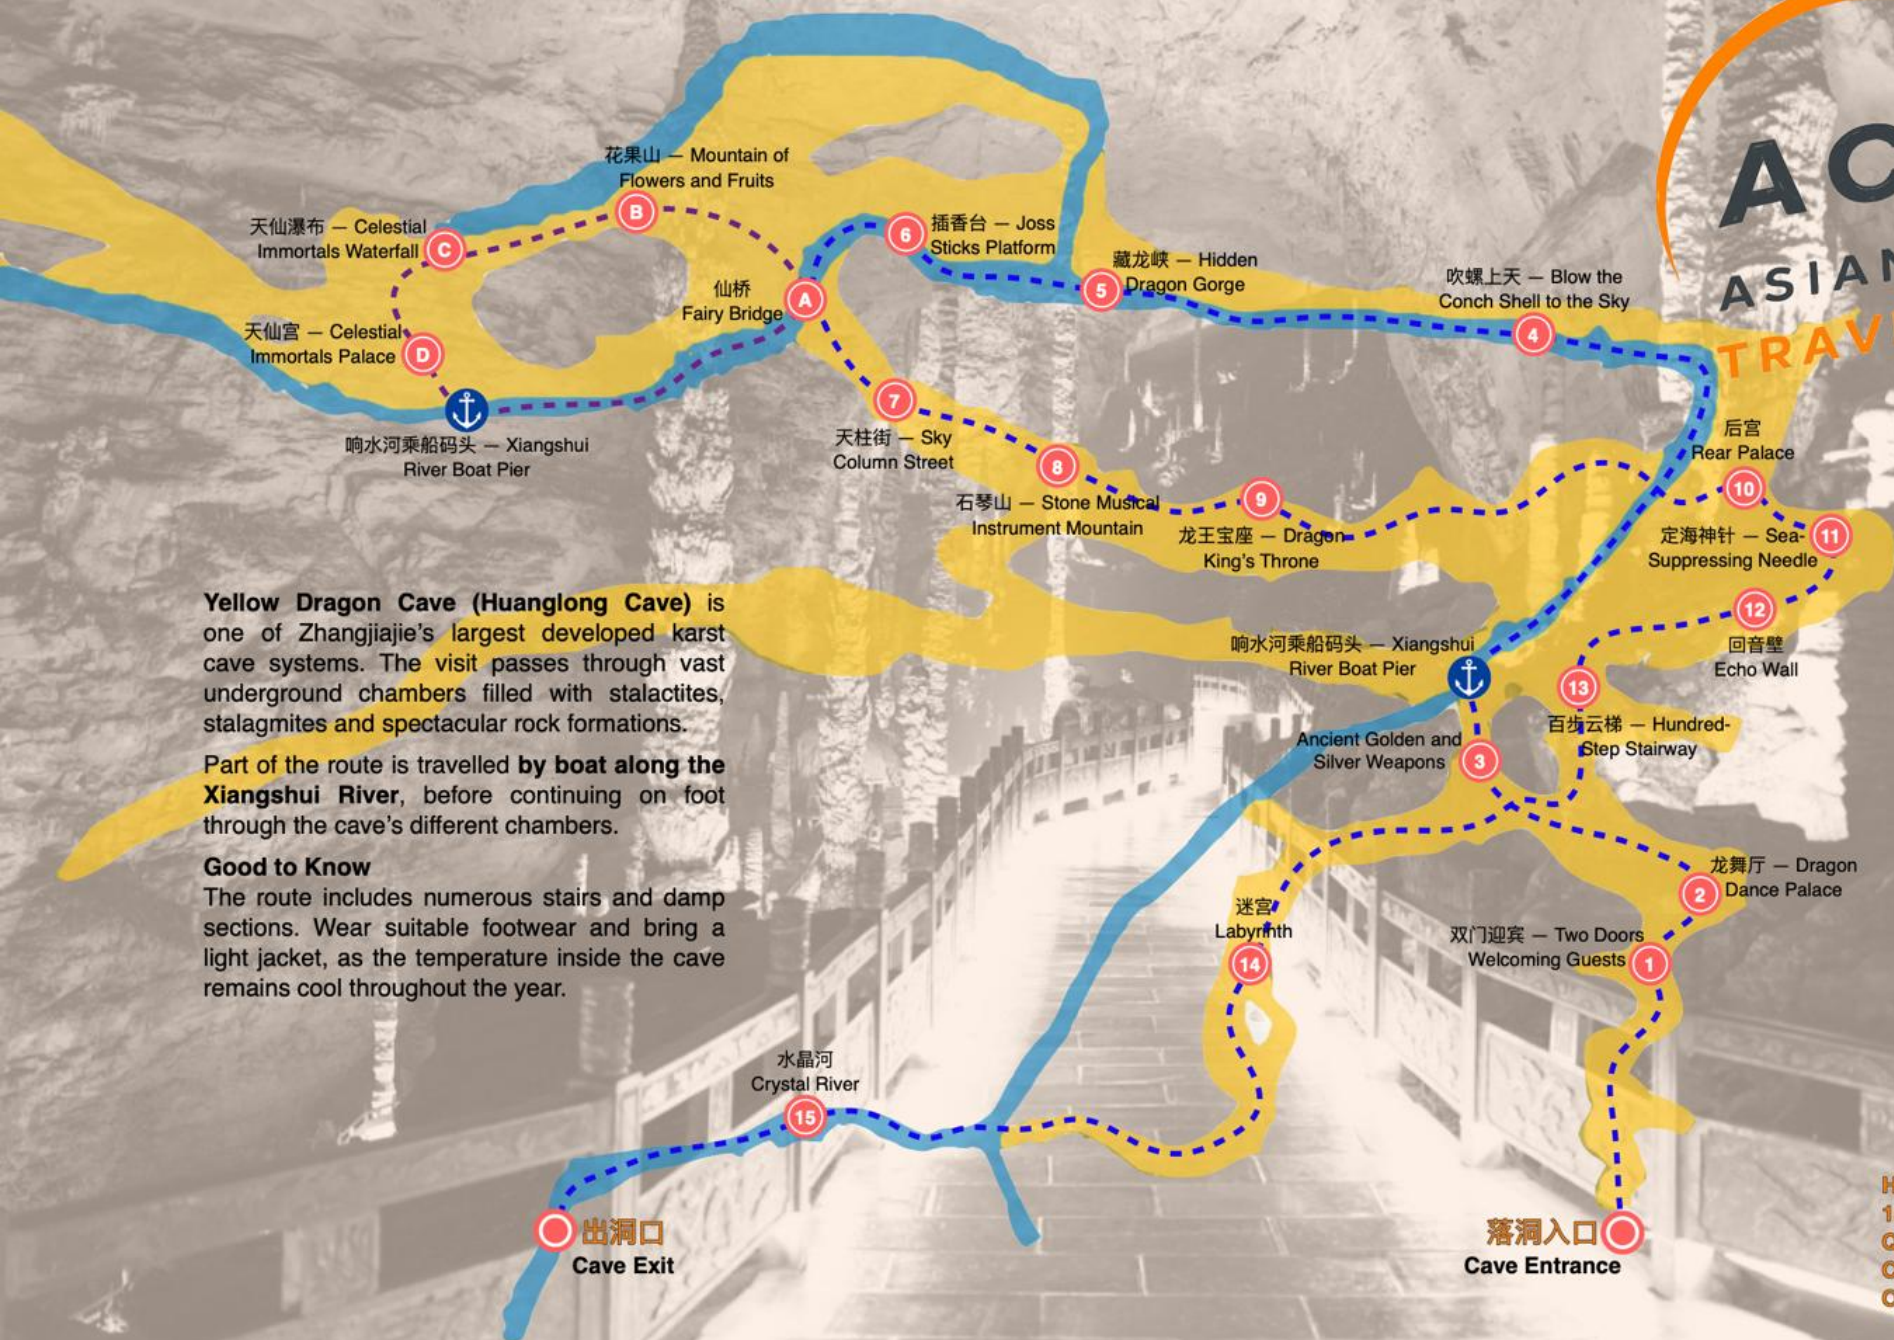

Yellow Dragon Cave (Huanglong Cave) is one of Zhangjiajie's largest developed karst cave systems. The visit passes through vast underground chambers filled with stalactites, stalagmites and spectacular rock formations.

Part of the route is travelled **by boat along the Xiangshui River**, before continuing on foot through the cave's different chambers.

Good to Know

The route includes numerous stairs and damp sections. Wear suitable footwear and bring a light jacket, as the temperature inside the cave remains cool throughout the year.
