Zhangjiajie Grand Canyon is a separate scenic area from Zhangjiajie National Forest Park/Wulingyuan. A visit combines the famous Glass Bridge, several attractions located above the canyon, and a walking route along the canyon floor.

From Rainbow Square, the trail gradually follows the stream through waterfalls, cliffs, pools and caves to Shenquan Lake and the scenic area exit.

Good to Know

Different tickets and routes do not necessarily include access to the same attractions. Some activities — zip line, VR experience, slides or elevators — may be optional or subject to the operating conditions of the day.
